## **PART I. FINANCIAL INFORMATION**

### **Forward-Looking Statements**

Except for the historical information included and incorporated by reference in this Quarterly Report on Form 10-Q, the information included and incorporated by reference herein are “forward-looking statements” within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. Forward-looking statements provide our current expectations or forecasts of future events and are not statements of historical fact. These forward-looking statements include information about possible or assumed future events, including, among other things, discussion and analysis of our future financial condition, results of operations and our strategic plans and objectives. When we use words such as “anticipate,” “believe,” “estimate,” “expect,” “intend,” “seek,” “may,” “might,” “plan,” “project,” “should,” “target,” “will,” or similar expressions, we intend to identify forward-looking statements.

Forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, many of which are beyond our control, are difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors, including, but not limited to, those described in the section entitled “Risk Factors” in our Annual Report on Form 10-K for the fiscal year ended December 31, 2018 and in our other public filings with the SEC.

The factors described herein are not necessarily all of the important factors that could cause actual results or developments to differ materially from those expressed in any of our forward-looking statements. Other unknown or unpredictable factors also could affect our forward-looking statements. Consequently, our actual performance could be materially different from the results described or anticipated by our forward-looking statements. Given these uncertainties, you should not place undue reliance on these forward-looking statements. Except as required by the applicable law, we undertake no obligation to update any forward-looking statements.

### **Market and Industry Data**

Certain market data and industry data included in this Quarterly Report on Form 10-Q were obtained from reports of governmental agencies and industry publications and surveys. We believe the data from third-party sources to be reliable based upon our management’s knowledge of the industry, but have not independently verified such data and as such, make no guarantees as to its accuracy, completeness or timeliness.

**(1) Organization**

Tiptree Inc. (together with its consolidated subsidiaries, collectively, Tiptree, the Company, or we) is a Maryland Corporation that was incorporated on March 19, 2007. Tiptree's Common Stock trades on the Nasdaq Capital Market under the symbol "TIPT". Tiptree is a holding company that combines specialty insurance operations with investment management capabilities. We allocate our capital across our insurance operations and other investments. We classify our business into one reportable segment: Specialty Insurance. We refer to our non-insurance operations, assets and other investments, which is comprised of our non-reportable segments and other business activities, as Tiptree Capital.

In this report "Common Stock" means Class A common stock \$0.001 par value for periods prior to June 7, 2018 and thereafter the common stock \$0.001 par value.

**(2) Summary of Significant Accounting Policies**

***Basis of Presentation and Principles of Consolidation***

The accompanying unaudited condensed consolidated financial statements of Tiptree have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP) and include the accounts of the Company and its subsidiaries. The condensed consolidated financial statements are presented in U.S. dollars, the main operating currency of the Company. The unaudited condensed consolidated financial statements presented herein should be read in conjunction with the annual audited financial statements included in the Company's annual report on Form 10-K for the fiscal year ended December 31, 2018. In the opinion of management, the accompanying unaudited interim financial information reflects all adjustments, including normal recurring adjustments necessary to present fairly the Company's financial position, results of operations, comprehensive income and cash flows for each of the interim periods presented. The results of operations for the three and six months ended June 30, 2019 are not necessarily indicative of the results that may be expected for the full year ending on December 31, 2019.

As a result of changes in presentation made in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2018, certain prior period amounts have been reclassified to conform to the current presentation. These reclassifications had no effect on the reported results of operations.

Tiptree consolidates those entities in which it has an investment of 50% or more of voting rights or has control over significant operating, financial and investing decisions of the entity as well as variable interest entities (VIEs) in which Tiptree is determined to be the primary beneficiary. VIEs are defined as entities in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity risk for the entity to finance its activities without additional subordinated financial support from other parties.

A VIE is required to be consolidated only by its primary beneficiary, which is defined as the party who has the power to direct the activities of a VIE that most significantly impact its economic performance and who has the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE. Tiptree's consolidated VIEs are entities which Tiptree is considered the primary beneficiary through its controlling financial interests.

Non-controlling interests on the condensed consolidated balance sheets represent the ownership interests in certain consolidated subsidiaries held by entities or persons other than Tiptree. Accounts and transactions between consolidated entities have been eliminated.

As a result of the adoption of ASU 2016-02, the Company's operating leases are now recognized on the condensed consolidated balance sheets as of January 1, 2019. See Note (14) Other Assets and Other Liabilities and Accrued Expenses for additional information.

**TIPTREE INC. AND SUBSIDIARIES**  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
June 30, 2019  
*(in thousands, except share data)*

***Use of Estimates***

The preparation of the Company's condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the Company's condensed consolidated financial statements and accompanying notes. Management makes estimates and assumptions that include, but are not limited to, the determination of the following significant items:

- Fair value of financial assets and liabilities, including, but not limited to, securities, loans and derivatives;
- Value of acquired assets and liabilities;
- Carrying value of goodwill and other intangibles, including estimated amortization period and useful lives;
- Reserves for unpaid losses and loss adjustment expenses, estimated future claims and losses, potential litigation and other claims;
- Valuation of contingent share issuances for compensation and purchase consideration, including estimates of number of shares and vesting schedules;
- Revenue recognition including, but not limited to, the timing and amount of insurance premiums, service and administration fees, and loan origination fees; and
- Other matters that affect the reported amounts and disclosure of contingencies in the condensed consolidated financial statements.

Although these and other estimates and assumptions are based on the best available estimates, actual results could differ materially from management's estimates.

***Fair Value Measurement***

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels, from highest to lowest, are defined as follows:

- Level 1 – Unadjusted, quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.
- Level 2 – Significant inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly through corroboration with observable market data. Level 2 inputs include quoted prices for similar instruments in active markets, and inputs other than quoted prices that are observable for the asset or liability. The types of financial assets and liabilities carried at level 2 are valued based on one or more of the following:
  - a) Quoted prices for similar assets or liabilities in active markets;
  - b) Quoted prices for identical or similar assets or liabilities in nonactive markets;
  - c) Pricing models whose inputs are observable for substantially the full term of the asset or liability;
  - d) Pricing models whose inputs are derived principally from or corroborated by observable market data through correlation or other means for substantially the full term of the asset or liability.
- Level 3 – Significant inputs that are unobservable inputs for the asset or liability, including the Company's own data and assumptions that are used in pricing the asset or liability.

***Fair Value Option***

In addition to the financial instruments the Company is required to measure at fair value, the Company has elected to make an irrevocable election to utilize fair value as the initial and subsequent measurement attribute for certain eligible financial assets and liabilities. Unrealized gains and losses on items for which the fair value option has been elected are reported in Net realized and unrealized gains (losses) within the condensed consolidated statements of operations. The decision to elect the fair value option is determined on an instrument-by-instrument basis and must be applied to an entire instrument and is irrevocable once elected.

**Recent Accounting Standards**

*Recently Adopted Accounting Pronouncements*

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), which sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract (i.e., lessees and lessors). The new standard requires lessees to apply a dual approach, classifying leases as either finance or operating leases based on the principle of whether or not the lease is effectively a financed purchase by the lessee. This classification will determine whether lease expense is recognized based on an effective interest method or on a straight-line basis over the term of the lease. A lessee is also required to record a right-of-use asset and a lease liability for all leases with a term of greater than 12 months regardless of their classification. Leases with a term of 12 months or less will be accounted for similar to existing guidance for operating leases today. The new standard requires lessors to account for leases using an approach that is substantially equivalent to existing guidance for sales-type leases, direct financing leases and operating leases. ASU 2016-02 supersedes the previous leases standard, Leases (Topic 840). The standard is effective on January 1, 2019, with early adoption permitted. The Company adopted the standard in the first quarter of 2019 under the modified retrospective approach without restating prior comparative periods. The adoption of the updated guidance resulted in the Company recognizing a right of use asset of \$32,052 as part of other assets and a lease liability of \$33,558 as part of other liabilities and accrued expenses in the condensed consolidated balance sheets, as well as de-recognizing the liability for deferred rent that was required under the previous guidance, for its operating lease agreements at January 1, 2019. We have elected the practical expedient to not separate lease components and non-lease components, and leases with an initial term of 12 months or less are not recorded on the balance sheet. The cumulative effect adjustment to the opening balance of retained earnings was zero.

In March 2017, the FASB issued ASU 2017-08, Receivables-Nonrefundable Fees and Other Costs (Subtopic 310-20): *Premium Amortization on Purchased Callable Debt Securities*. The new guidance is effective for fiscal years beginning after December 15, 2018 and interim periods within those years. Early adoption is permitted for interim or annual reporting periods beginning after December 15, 2017. The guidance is to be applied on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. The guidance shortens the amortization period for certain callable debt securities held at a premium, requiring the premium to be amortized to the earliest call date. The adoption of this standard did not have a material impact on the Company's condensed consolidated financial statements.

In August 2017, the FASB issued ASU 2017-12, Derivatives and Hedging (Topic 815): *Targeted Improvements to Accounting for Hedging Activities*, which amends the guidance on hedge accounting. The amendment will make more financial and nonfinancial hedging strategies eligible for hedge accounting and amend the presentation and disclosure requirements. It is intended to more closely align hedge accounting with companies' risk management strategies, simplify the application of hedge accounting, and increase transparency as to the scope and results of hedging programs. ASU 2017-12 can be adopted immediately in any interim or annual period. The mandatory effective date for calendar year-end public companies is January 1, 2019. The adoption of this standard did not have a material impact on the Company's condensed consolidated financial statements.

In February 2018, the FASB issued ASU 2018-02, Income Statement-Reporting Comprehensive Income (Topic 220): *Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income* (AOCI), which permits companies to reclassify stranded tax effects caused by Public Law no. 115-97, commonly referred to as the Tax Cuts and Jobs Act (Tax Act), from accumulated other comprehensive income (AOCI) to retained earnings. Deferred tax assets (DTA) related to available for sale (AFS) securities unrealized gains and losses that were revalued as of December 31, 2017 created stranded tax effects in accumulated other comprehensive income (AOCI) due to the enactment of the Tax Act, due to the nature of existing GAAP requiring recognition of tax rate change effects on the DTA revaluation related to AFS securities as an adjustment to the provision for income taxes. Specifically, ASU 2018-02 permits a reclassification from AOCI to retained earnings for stranded tax effects resulting from the Tax Act. Additionally, the ASU requires new disclosures by all companies, whether they opt to do the reclassification or not. The amendments in ASU 2018-02 are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years, with early adoption permitted. The Company has adopted the standard effective January 1, 2019, and reclassified the stranded tax effects caused by the Tax Act from AOCI to retained earnings. The standard is applied in the period of adoption, and the impact to the Company's condensed consolidated financial statements in the period of adoption is not material. The Company's accounting policy for the release of stranded tax effects in AOCI is the aggregate portfolio approach.

*Recently Issued Accounting Pronouncements, Not Yet Adopted*

In June 2016, the FASB issued ASU 2016-13 Financial Instruments - Credit Losses (Topic 326): *Measurement of Credit Losses*

**TIPTREE INC. AND SUBSIDIARIES**  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
June 30, 2019  
*(in thousands, except share data)*

on *Financial Instruments*, which amends guidance on reporting credit losses for assets held at amortized cost basis and available for sale debt securities. For assets held at amortized cost basis, Topic 326 eliminates the probable initial recognition threshold in current GAAP and, instead requires an entity to reflect its current estimate of all expected credit losses. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial assets to present the net amount expected to be collected. For available for sale debt securities, credit losses should be measured in a manner similar to current GAAP, however Topic 326 will require that credit losses be presented as an allowance rather than as a write-down. This ASU affects entities holding financial assets and net investment in leases that are not accounted for at fair value through net income. The amendments in ASU 2016-13 are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years, with early adoption permitted as of the fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The amendments will affect loans, debt securities, trade receivables, net investments in leases, off balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. The Company is currently evaluating the effect on its condensed consolidated financial statements.

In January 2017, the FASB issued ASU 2017-04, *Simplifying the Test for Goodwill Impairment*. ASU 2017-04 does not change the qualitative assessment; however, it removes “the requirements for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails that qualitative test, to perform Step 2 of the goodwill impairment test.” Instead, all reporting units, even those with a zero or negative carrying amount will apply the same impairment test. Therefore, as the FASB notes in the ASU’s Basis for Conclusions, the goodwill of reporting units with zero or negative carrying values will not be impaired, even when conditions underlying the reporting unit indicate that goodwill is impaired. Entities will, however, be required to disclose any reporting units with zero or negative carrying amounts and the respective amounts of goodwill allocated to those reporting units. The amendments in ASU 2017-04 are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years, with early adoption permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The Company is currently evaluating the effect on its condensed consolidated financial statements.

In August 2018, the FASB issued ASU 2018-13, *Fair Value Measurement (Topic 820): Changes to the Disclosure Requirements for Fair Value Measurement*, which modifies the disclosure requirements on fair value measurements in Topic 820. The modifications include the removal of certain requirements, modifications to existing requirements and additional requirements. The amendments in ASU 2018-13 are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019, with early adoption permitted. The Company is currently evaluating the effect on its condensed consolidated financial statements.

### **(3) Dispositions, Assets Held for Sale and Discontinued Operations**

#### *Dispositions*

On April 10, 2019, the Company completed the sale of the management contracts and related assets for the CLOs managed by Telos Asset Management, LLC (Telos). The pre-tax gain on sale for the three months ended June 30, 2019 was \$7.6 million, which is included in other revenue. See Note (15) Other Revenue, Other Expenses and Other Income. The sale did not meet the requirements to be classified as a discontinued operation.

The sale agreement also contains a provision which provides for contingent consideration if the Telos business achieves specific performance metrics. This contingent consideration represents a gain contingency, and the Company will not recognize any additional gain unless such consideration is realized.

On February 1, 2018, the Company completed the sale of Care, as well as two senior living properties held in our specialty insurance business to Invesque Inc. (Invesque). The pre-tax comprehensive income on the sale for the six months ended June 30, 2018 was approximately \$44.2 million, which consists of \$46.2 million gain on sale of a subsidiary, \$1.8 million of realized gain on the sale of the specialty insurance properties, offset by the reclassification of the interest rate swap from AOCI of \$3.8 million. In December 2018, an additional gain on sale of a subsidiary of \$10.7 million of earnout consideration was recognized as a result of a portfolio disposition by Invesque.

Total consideration received for the sale of Care was \$150.7 million, including approximately 16.6 million shares of Invesque, resulting in an ownership of approximately 34% of the acquiring company at the time of sale. The Company has elected to apply the fair value option to the investment in Invesque. As such, these shares are held at fair value within equity securities.

When the Company entered into a purchase agreement on November 16, 2017 to sell Care, the Company concluded that the sale met the requirements to be classified as a discontinued operation. As a result, the Company reclassified the income and expenses attributable to Care to net income (loss) from discontinued operations through the completion of the sale.

The Company has entered into a definitive agreement to sell Luxury, which is pending a regulatory review, and is classified as held for sale at June 30, 2019 and December 31, 2018. The agreement did not meet the requirements to be classified as a discontinued operation.

As of June 30, 2019 and December 31, 2018, the Company did not record any impairments with respect to assets held for sale.

**(4) Operating Segment Data**

Tiptree is a holding company that combines specialty insurance operations with investment management capabilities. We allocate our capital across our insurance operations and other investments. We classify our business into one reportable segment – Specialty Insurance. We refer to our non-insurance operations, assets and other investments, which is comprised of our non-reportable operating segments and other business activities, as Tiptree Capital. Corporate activities include holding company interest expense, employee compensation and benefits, and other expenses.

Our reportable segment's income or loss is reported before income taxes, discontinued operations and non-controlling interests. Segment results incorporate the revenues and expenses of these subsidiaries since they commenced operations or were acquired. As of December 31, 2018, Mortgage and Asset Management, which previously were reportable segments, no longer met the quantitative threshold for disclosure. Those are now reported in Other, which we refer to as Tiptree Capital. Prior periods have been conformed to the current year presentation. Intercompany transactions are eliminated.

Descriptions of our reportable segment and of Tiptree Capital are as follows:

**Specialty Insurance** operations are conducted through Fortegra Financial Corporation (Fortegra), an insurance holding company. Fortegra underwrites and provides specialty insurance products, primarily in the United States, and is a leading provider of credit insurance and asset protection products. Fortegra's range of products and services include credit protection insurance, warranty and service contract products, and other specialty insurance programs which underwrite niche personal and commercial lines of insurance. We also offer various other insurance related products and services throughout the U.S. through our non-regulated subsidiaries.

**Tiptree Capital** includes our asset management, mortgage and shipping operations, and other investments (including our Invesque shares).

The tables below present the components of revenue, expense, pre-tax income (loss), and assets for our reportable segment as well as Tiptree Capital for the following periods:

Management believes that it is more likely than not that the Company will be able to hold the available for sale securities that were in an unrealized loss position as of June 30, 2019 until full recovery of their amortized cost basis for fixed maturity securities. The unrealized losses were attributable to changes in interest rates and not credit-related issues. As of June 30, 2019 and December 31, 2018, based on the Company's review, none of the fixed maturity securities were deemed to be other-than-temporarily impaired based on the Company's analysis of the securities and its intent to hold the securities until recovery.

Pursuant to certain reinsurance agreements and statutory licensing requirements, the Company has deposited invested assets in custody accounts or insurance department safekeeping accounts. The Company cannot remove invested assets from these accounts without prior approval of the contractual party or regulatory authority, as applicable. The following table presents the Company's restricted investments included in the Company's available for sale securities:

**(9) Derivative Financial Instruments and Hedging**

The Company utilizes derivative financial instruments as part of its overall investment and hedging activities. Derivative contracts are subject to additional risk that can result in a loss of all or part of an investment. The Company's derivative activities are primarily classified by underlying credit risk and interest rate risk. In addition, the Company is also subject to additional counterparty risk should it's counterparties fail to meet the contract terms. The derivative financial instruments are located within derivative assets at fair value and are reported in other investments. Derivative liabilities are reported within other liabilities and accrued expenses.

**Derivatives, at fair value**

*Interest Rate Lock Commitments*

The Company enters into interest rate lock commitments (IRLCs) with customers in connection with its mortgage banking activities to fund residential mortgage loans with certain terms at specified times in the future. IRLCs that relate to the origination of mortgage loans that will be classified as held-for-sale are considered derivative instruments under applicable accounting guidance. As such, these IRLCs are recorded at fair value with changes in fair value typically resulting in recognition of a gain when the Company enters into IRLCs. In estimating the fair value of an IRLC, the Company assigns a probability that the loan commitment will be exercised and the loan will be funded ("pull through"). The fair value of the commitments is derived from the fair value of related mortgage loans, net of estimated costs to complete. Outstanding IRLCs expose the Company to the risk that the price of the loans underlying the commitments might decline from inception of the rate lock to funding of the loan. To manage this risk, the Company utilizes forward delivery contracts and TBA mortgage backed securities to economically hedge the risk of potential changes in the value of the loans that would result from the commitments.

*Forward Delivery Contracts and TBA Mortgage Backed Securities*

The Company enters into forward delivery contracts with loan aggregators and other investors as one of the tools to manage the interest rate risk associated with IRLCs and loans held for sale. In addition, the Company enters into to be announced (TBA) mortgage backed securities which facilitate hedging and funding by allowing the Company to prearrange prices for mortgages that are in the process of originating. The Company utilizes these hedging instruments for Agency (Fannie Mae and Freddie Mac) and FHA/VA (Ginnie Mae) eligible IRLCs.

As of June 30, 2019, the Company is in compliance with the representations and covenants for outstanding borrowings or has obtained waivers for any events of non-compliance.

**(11) Fair Value of Financial Instruments**

The Company maximizes the use of observable inputs and minimizes the use of unobservable inputs to the extent possible to measure a financial instrument's fair value. Observable inputs reflect the assumptions market participants would use in pricing an asset or liability, and are affected by the type of product, whether the product is traded on an active exchange or in the secondary market, as well as current market conditions. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. Fair value is estimated by applying the hierarchy discussed in Note (2) Summary of Significant Accounting Policies which prioritizes the inputs used to measure fair value into three levels and bases the categorization within the hierarchy upon the lowest level of input that is available and significant to the fair value measurement. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized within Level 3 of the fair value hierarchy.

The Company's fair value measurement is based primarily on a market approach, which utilizes prices and other relevant information generated by market transactions involving identical or comparable financial instruments. Sources of inputs to the market approach include third-party pricing services, independent broker quotations and pricing matrices. Management analyzes the third party valuation methodologies and its related inputs to perform assessments to determine the appropriate level within the fair value hierarchy and to assess reliability of values. Further, management has a process in place to review all changes in fair value that occurred during each measurement period. Any discrepancies or unusual observations are followed through to resolution through the source of the pricing as well as utilizing comparisons, if applicable, to alternate pricing sources. In addition, the Company utilizes an income approach to measure the fair value of NPLs, as discussed below.

The Company utilizes observable and unobservable inputs within its valuation methodologies. Observable inputs may include: benchmark yields, reported trades, broker-dealer quotes, issuer spreads, benchmark securities, bids, offers and reference data. In addition, specific issuer information and other market data is used. Broker quotes are obtained from sources recognized to be market participants. Unobservable inputs may include: expected cash flow streams, default rates, supply and demand considerations and market volatility.

***Available for Sale Securities***

Available for sale securities are generally classified within either Level 1 or Level 2 of the fair value hierarchy and are based on prices provided by an independent pricing service and a third party investment manager who provide a single price or quote per security.

The following details the methods and assumptions used to estimate the fair value of each class of available for sale securities and the applicable level each security falls within the fair value hierarchy:

*U.S. Treasury Securities, Obligations of U.S. Government Authorities and Agencies, Obligations of State and Political Subdivisions, Corporate Securities, Asset-Backed Securities, and Obligations of Foreign Governments:* Fair values were obtained from an independent pricing service and a third party investment manager. The prices provided by the independent pricing service are based on quoted market prices, when available, non-binding broker quotes, or matrix pricing and fall under Level 2 or Level 3 of the fair value hierarchy.

*Certificates of Deposit:* The estimated fair value of certificates of deposit approximate carrying value and fall under Level 1 of the fair value hierarchy.

***Equity securities***

The fair values of publicly traded common and preferred stocks were obtained from market value quotations provided by an independent pricing service and fall under Level 1 of the fair value hierarchy. The fair values of non-publicly traded common and preferred stocks were based on prices obtained from an independent pricing service using unobservable inputs and fall under Level 3 of the fair value hierarchy.

The Company's investment in Invesque is subject to certain contractual and functional sale restrictions. The functional restriction period is sequential to the contractual restriction period. As of June 30, 2019, the weighted average estimated contractual sale restriction period was 0.25 months, with 25% of the shares restricted from sale for a period of 1 month. In addition, as of June 30, 2019, the weighted average estimated functional restriction period was 0.2 months, with 25% of the shares restricted for a period of 0.75 months. The fair value of the Invesque shares is based on the market price adjusted for the impact of these restrictions, and as a result of the discount on the Invesque investment, the fair value measurement falls under Level 2 of the fair value hierarchy.

***Loans, at fair value***

*Corporate Loans:* These loans are comprised of a diversified portfolio of middle market and broadly syndicated leveraged loans and are generally classified within either Level 2 or Level 3 in the fair value hierarchy. To determine fair value, the Company uses quoted prices which include those provided from pricing vendors, where available. We perform internal price verification procedures to ensure that the prices and quotes provided from the independent pricing vendors are reasonable. Such verification procedures include comparison of pricing sources and analysis of variances among pricing sources. The Company has evaluated each loan's respective liquidity and has additionally performed valuation benchmarking. The key characteristics which were evaluated as part of this determination were liquidity ratings, price changes to index benchmarks, depth of quotes, credit ratings and industry trends.

*Mortgage Loans Held for Sale:* Mortgage loans held for sale are generally classified as Level 2 in the fair value hierarchy and fair value is based upon forward sales contracts with third party investors, including estimated loan costs, and reserves.

*Nonperforming Loans and REO:* The Company determines the purchase price for NPLs at the time of acquisition and for each subsequent valuation by using a discounted cash flow valuation model and considering alternate loan resolution probabilities, including modification, liquidation, or conversion to REO. The significant unobservable inputs used in the fair value measurement of our NPLs are discount rates, loan resolution timeline, and the value of underlying properties. The fair values of NPLs which are making payments (generally based on a modification or a workout plan) are primarily based upon secondary market transaction prices, which are expressed as a percentage of unpaid principal balance (UPB). Observable inputs to the model include loan amounts, payment history, and property types. Our NPLs are on nonaccrual status at the time of purchase as it is probable that principal or interest is not fully collectible. NPLs are included in loans, at fair value and fall under Level 3 of the fair value hierarchy.

*(in thousands, except share data)*

NPLs that have become REOs were measured at fair value on a non-recurring basis at the time of transfer during the six months ended June 30, 2019 and the year ended December 31, 2018. The carrying value of REOs at June 30, 2019 and December 31, 2018 was \$7,035 and \$10,019, respectively. Upon conversion to REO, the fair value is estimated using a broker price opinion (BPO). BPOs are subject to judgments of a particular broker formed by visiting a property, assessing general home values in an area, reviewing comparable listings, and reviewing comparable completed sales. These judgments may vary among brokers and may fluctuate over time based on housing market activities and the influx of additional comparable listings and sales. REO is included in other investments. Subsequent to conversion, REOs are carried at lower of cost or market.

***Derivative Assets and Liabilities***

Derivatives are comprised of interest rate lock commitments (IRLC) and to be announced mortgage backed securities (TBA). The fair value of these instruments is based upon valuation pricing models, which represent the amount the Company would expect to receive or pay at the balance sheet date to exit the position. Our mortgage origination subsidiaries issue IRLCs to its customers, which are carried at estimated fair value on the Company's condensed consolidated balance sheet. The estimated fair values of these commitments are generally calculated by reference to the value of the underlying loan associated with the IRLC net of costs to produce and an expected fall out assumption. The fair values of these commitments generally result in a Level 3 classification. Our mortgage origination subsidiaries manage their exposure by entering into forward delivery commitments with loan investors. For loans not locked with investors under a forward delivery commitment, the Company enters into hedge instruments, primarily TBAs, to protect against movements in interest rates. The fair values of TBA mortgage backed securities and forward delivery contracts generally result in a Level 2 classification.

The following tables present the Company's fair value hierarchies for financial assets and liabilities, measured on a recurring basis:

The following is quantitative information about Level 3 assets with significant unobservable inputs used in fair valuation.

Assets	Fair Value as of		Valuation technique	Unobservable input(s)	Actual or Range (Weighted average)	
	June 30, 2019	December 31, 2018			June 30, 2019	December 31, 2018
Interest rate lock commitments	\$ 6,338	\$ 3,460	Internal model	Pull through rate	45% - 95%	50% - 95%
NPLs	6,582	27,556	Discounted cash flow	See table below <sup>(1)</sup>	See table below	See table below
Total	\$ 12,920	\$ 31,016				

<sup>(1)</sup> Significant changes in any of these inputs in isolation could result in a significant change to the fair value measurement. A decline in the discount rate in isolation would increase the fair value. A decrease in the housing pricing index in isolation would decrease the fair value. Individual loan characteristics, such as location and value of underlying collateral, affect the loan resolution timeline. An increase in the loan resolution timeline in isolation would decrease the fair value. A decrease in the value of underlying properties in isolation would decrease the fair value.

The following table presents quantitative information about the significant unobservable inputs used to measure the fair value of our NPLs. For NPLs that are not making payments, discount rate, loan resolution time-line, value of underlying properties, holding costs and liquidation costs are the primary inputs used to measure fair value. For NPLs that are making payments, note rate and secondary market transaction prices/UPB are the primary inputs used to measure fair value.

**Debentures:** Since interest rates on debentures are at current market rates for similar credit risks, the carrying amount approximates fair value. These values are net of allowance for doubtful accounts.

**Notes and Accounts Receivable:** To the extent that carrying amounts differ from fair value, fair value is determined based on contractual cash flows discounted at market rates for similar credits. Categorized as Level 2 of the fair value hierarchy.

*Debt:* The carrying value, which approximates fair value of LIBOR based debt, represents the total debt balance at face value excluding the unamortized discount. The fair value of the Junior subordinated notes is determined based on dealer quotes. Categorized as Level 3 of the fair value hierarchy.

Additionally, the following financial assets and liabilities on the condensed consolidated balance sheets are not carried at fair value, but whose carrying amounts approximate their fair value:

*Cash and Cash Equivalents:* The carrying amounts of cash and cash equivalents are carried at cost which approximates fair value. Categorized as Level 1 of the fair value hierarchy.

*Accounts and Premiums Receivable, net, retrospective commissions receivable and other receivables:* The carrying amounts approximate fair value since no interest rate is charged on these short duration assets. Categorized as Level 2 of the fair value hierarchy. See Note (6) Notes and Accounts Receivable, net.

*Due from Brokers, Dealers, and Trustees and Due to Brokers, Dealers and Trustees:* The carrying amounts are included in other assets and other liabilities and accrued expenses and approximate their fair value due to their short-term nature. Categorized as Level 2 of the fair value hierarchy.

For the six months ended June 30, 2019, the Company's specialty insurance business experienced an increase in prior year case development of \$3,194, primarily from its non-standard auto business.

For the six months ended June 30, 2018, the Company's specialty insurance business experienced an increase in prior year case development of \$4,886. This included \$2,099 in non-standard auto and \$4,564 in credit. This development was partially offset by favorable development in its warranty business. The warranty and credit lines of business are primarily in retrospective commission arrangements that cause loss development to minimally impact the operating income of the Company.

**(13) Revenue From Contracts with Customers**

Revenue from contracts with customers is primarily comprised of asset management fee income included as a part of other revenue, and warranty coverage, car club and other revenues included as a part of service and administrative fees in our specialty insurance business. The following table presents the disaggregated amounts of revenue from contracts with customers by product type for the following periods:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2019	2018	2019	2018

Revenue from contracts with customers	\$ 17,986	\$ 17,296	\$ 36,484	\$ 34,922

**Management Fees**

The Company earned asset management fee income in the form of base management fees and incentive fees from the CLOs it managed. These base management fees were billed as the services were provided and paid periodically in accordance with the terms of the individual management agreements for as long as the Company managed the funds. Base management fees typically consisted of fees based on the amount of assets held in the CLOs. Base management fees were recognized as revenue when earned. The Company did not recognize incentive fees until all contractual contingencies were removed.

**Service and Administrative Fees**

Service fee revenue is recognized as the services are performed. These services include fulfillment, software development, and claims handling for our customers. Management reviews the financial results under each significant contract on a monthly basis. Any losses that may occur due to a specific contract would be recognized in the period in which the loss is determined probable.

Administrative fee revenue includes the administration of premium associated with our producers and their producer owned reinsurance companies (PORCs). In addition, we also earn fee revenue from debt cancellation programs, motor club programs, and warranty programs. Related administrative fee revenue is recognized consistent with the earnings recognition pattern of the underlying insurance policies, debt cancellation contracts and motor club memberships being administered, using Rule of 78's, modified Rule of 78's, pro rata, or other methods as appropriate for the contract. Management selects the appropriate method based on available information, and periodically reviews the selections as additional information becomes available.

**Information on Remaining Performance Obligations**

We do not disclose information about remaining performance obligations pertaining to contracts that have an original expected duration of one year or less. The transaction price allocated to remaining unsatisfied or partially unsatisfied performance obligations with an original expected duration exceeding one year was not material at June 30, 2019.

**Contract Balances**

The timing of our revenue recognition may differ from the timing of payment by our customers. We record a receivable when revenue is recognized prior to payment and we have an unconditional right to payment. Alternatively, when payment precedes the provision of the related services, we record deferred revenue until the performance obligations are satisfied.

The following table presents the activity in the significant deferred assets and liabilities related to revenue from contracts with customers for the six months ended June 30, 2019.

**Statutory Reporting and Insurance Company Subsidiaries Dividend Restrictions**

The Company's regulated insurance company subsidiaries may pay dividends to our insurance holding company, subject to statutory restrictions. Payments in excess of statutory restrictions (extraordinary dividends) to our insurance holding company are permitted only with prior approval of the insurance department of the applicable state of domicile. The Company eliminated all dividends from its subsidiaries in the condensed consolidated financial statements.

The following table presents the dividends paid to our insurance holding company by its regulated insurance company subsidiaries for the following periods:

Notes to Condensed Consolidated Financial Statements (Unaudited)  
June 30, 2019  
*(in thousands, except share data)*

At June 30, 2019, the maximum amount of dividends that our regulated insurance company subsidiaries could pay under applicable laws and regulations without regulatory approval was approximately \$4,531. The Company may seek regulatory approval to pay dividends in excess of this permitted amount, but there can be no assurance that the Company would receive regulatory approval if sought.

Under the National Association of Insurance Commissioners (NAIC) Risk-Based Capital Act of 1995, a company's Risk-Based Capital (RBC) is calculated by applying certain risk factors to various asset, claim and reserve items. If a company's adjusted surplus falls below calculated RBC thresholds, regulatory intervention or oversight is required. The Company's insurance company subsidiaries' RBC levels, as calculated in accordance with the NAIC's RBC instructions, exceeded all RBC thresholds as of June 30, 2019.

The following table presents the statutory net income of the Company's statutory insurance companies for the following periods:

**(18) Stock Based Compensation**

*2017 Omnibus Incentive Plan*

The Company adopted the Tiptree 2017 Omnibus Incentive Plan (2017 Equity Plan) on June 6, 2017, which permits the grant of stock units, stock, and stock options up to a maximum of 6,100,000 shares of Common Stock. The general purpose of the 2017 Equity Plan is to attract, motivate and retain selected employees and directors for the Company and its subsidiaries, to provide them with incentives and rewards for performance and to better align their interests with the interests of the Company's stockholders. Unless otherwise extended, the 2017 Equity Plan terminates automatically on June 6, 2027. The table below summarizes changes to the issuances under the Company's 2017 Equity Plan for the periods indicated, excluding awards granted under the Company's subsidiary incentive plans that are exchangeable for Tiptree Common Stock:

	Number of shares <sup>(1)</sup>
Available for issuance as of December 31, 2018	5,474,214
RSU and option awards granted	(680,144)
Forfeited	8,318
Subsidiary exchanged shares	(14,400)
Available for issuance as of June 30, 2019	4,787,988

<sup>(1)</sup> Excludes awards granted under the Company's subsidiary incentive plans that are exchangeable for Tiptree Common Stock.

**Restricted Stock Units (RSUs)**

*Tiptree Corporate Incentive Plans*

The Company values RSUs at their grant-date fair value as measured by Tiptree's Common Stock price. Generally, the Tiptree RSUs vest and become nonforfeitable with respect to one-third of Tiptree shares granted on each of the first, second and third anniversaries of the date of the grant, and expensed using the straight-line method over the requisite service period.

The following table presents changes to the issuances of RSUs under the 2017 Equity Plan for the periods indicated:

	Number of shares issuable	Weighted average grant date fair value
Unvested units as of December 31, 2018	676,630	\$ 6.27

<sup>(1)</sup> Includes 307,148 shares that vest ratably over three years, 112,907 shares that cliff vest in February 2021 and the remaining shares vested immediately.

*Subsidiary Incentive Plans*

Certain of the Company's subsidiaries have established RSU programs under which they are authorized to issue RSUs or their equivalents, representing equity of such subsidiaries to certain of their employees. Such awards are accounted for as equity. These RSUs are subject to performance-vesting criteria based on the performance of the subsidiary (performance vesting RSUs) and time-vesting subject to continued employment (time vesting RSUs). Following the service period, such vested RSUs may be exchanged at fair market value, at the option of the holder, for Tiptree Common Stock under the 2017 Equity Plan. The service period for certain grants has been achieved and those vested subsidiary RSU's are currently eligible for exchange. The Company has the option, but not the obligation to settle the exchange right in cash.

The following table presents changes to the issuances of subsidiary RSU's under the subsidiary incentive plans for the periods indicated:

	Grant date fair value of equity shares issuable
Unvested balance as of December 31, 2018	\$ 8,710
Granted	—
Vested	(4,644)
Unvested balance as of June 30, 2019	<u>\$ 4,066</u>

The vested and unvested balance (assuming full vesting) translates to an aggregate of 3,009,826 shares of Common Stock if converted as of June 30, 2019, of which 902,949 are vested and eligible for exchange as of June 30, 2019.

*Stock Options - Tiptree Corporate*

Option awards have been granted to the Executive Committee with an exercise price equal to the fair market value of our Common Stock on the date of grant. The option awards have a 10-year term and are subject the recipient's continuous service, a market requirement, and vest one third on each of the third, fourth and fifth anniversary of the grant date. The market requirement is a book value per share target that can be met at any time before the option expires and it only needs to be met once for the option to remain exercisable for the remainder of its term. If the service condition is met, the full amount of the compensation expense will be recognized over the appropriate vesting period whether the market requirement is met or not. The options granted in 2018 include a retirement provision and are amortized over the lesser of the service condition or expected retirement date.

The fair value option grants are estimated on the date of grant using a Black-Scholes-Merton option pricing formula embedded within a Monte Carlo model used to simulate the future stock prices of the Company, which assumes that the market requirement is achieved. Historical volatility was computed based on historical daily returns of the Company's stock between the grant date and July 1, 2013, the date of the business combination through which Tiptree became a public company. The valuation is done under a risk-neutral framework using the 10-year zero-coupon risk-free interest rate derived from the Treasury Constant Maturities yield curve on the grant date. The current quarterly dividend rates in effect as of the date of the grant are used to calculate a spot dividend yield as of the date of grant for use in the model.

**(20) Commitments and Contingencies**

**Operating Leases**

All leases are office space leases and are classified as operating leases that expire through 2028. Some of our office leases include the option to extend for up to five years or less at management's discretion. Such extension options were not included in the measurement of the lease liability. Below is a summary of our right of use asset and lease liability as of June 30, 2019.

	As of June 30, 2019

***Litigation***

The Company is a defendant in Mullins v. Southern Financial Life Insurance Co., which was filed in February 2006, in the Pike Circuit Court, in the Commonwealth of Kentucky. A class was certified in June 2010. At issue is the duration or term of coverage under certain disability and life credit insurance policies. The action alleges violations of the Consumer Protection Act and certain insurance statutes, as well as common law fraud and seeks compensatory and punitive damages, attorney fees and interest. To date, the court has not awarded sanctions in connection with Plaintiffs' April 2012 Motion for Sanctions. In January 2015, the trial court issued an Order denying the Company's motion to decertify the class, which was upheld on appeal. Following a February 2017 hearing, the court denied the Company's Motion for Summary Judgment as to certain disability insurance policies. In January 2018, the court vacated its November 2017 order granting Company's Motion for Summary Judgment as to the life certificates at issue with leave to refile. No trial or additional hearings are currently scheduled.

The Company considers such litigation customary in the insurance industry. In management's opinion, based on information available at this time, the ultimate resolution of such litigation, which it is vigorously defending, should not be materially adverse to the financial position of the Company. It should be noted that large punitive damage awards, bearing little relation to actual damages sustained by plaintiffs, have been awarded in certain states against other companies in the credit insurance business. At this time, the Company cannot estimate a range of loss that is reasonably possible.

The Company and its subsidiaries are parties to other legal proceedings in the ordinary course of business. Although the Company's legal and financial liability with respect to such proceedings cannot be estimated with certainty, the Company does not believe that these proceedings, either individually or in the aggregate, are likely to have a material adverse effect on the Company's financial position.

**(21) Earnings Per Share**

The Company calculates basic net income per share of Common Stock (Common Share) based on the weighted average number of Common Shares outstanding (inclusive of vested corporate restricted share units). The unvested corporate restricted share units have the non-forfeitable right to participate in dividends declared and paid on the Company's Common Stock on an as vested basis and are therefore considered a participating security. The Company calculates basic earnings per share using the "two-class" method, and for the three and six months ended June 30, 2019 and 2018, the income available to Common Stockholders was allocated to the unvested restricted stock units.

Diluted net income per Common Share for the period includes the effect of unvested subsidiaries' RSUs. For the three and six months ended June 30, 2019, the assumed exercise of all potentially dilutive instruments were anti-dilutive, and therefore, were not included in the diluted net income per common share calculation.

**(22) Related Party Transactions**

On February 15, 2019, the Company and Corvid Peak (formerly known as Tricadia), entered into a Strategic Combination Agreement and Amended and Restated Transition Services Agreement (the Transition Services Agreement). Corvid Peak is a related party of the Company because Corvid Peak is deemed to be controlled by Michael Barnes, the Company's Executive Chairman. Tiptree agreed to invest \$75 million to seed new investment funds to be managed by Corvid Peak. The Company will pay Corvid Peak an annual management fee of 1.25% of the net asset value of invested capital, 1.25% of the \$75 million commitment to the extent not invested and an incentive fee equal to 20% of the net profits.

No consideration was paid at the closing of the Strategic Combination Agreement. Tiptree will over time receive a 51% economic interest in certain profit shares interests in Corvid Peak, in increments stepping up by 10.2% each year, beginning in 2021. Beginning on January 1, 2026, Tiptree has the right to acquire the remaining economic interests in Corvid Peak that are held by Mr. Barnes, based upon a fair value-based formula. Beginning on January 1, 2027, Mr. Barnes has the reciprocal right to put his remaining economic interests in Corvid Peak to Tiptree using the same formula. Mr. Barnes has substantive participating rights over specified actions at Corvid Peak so long as he owns at least 10% of the equity of Corvid Peak. Tiptree and Corvid Peak have agreed to provide each other with certain support services on an arms'-length basis, pursuant to the Transition Services Agreement. The Company has concluded that it will account for any ownership interest it obtains in Corvid Peak using the equity method of accounting until such time as a controlling financial interest (as defined in the applicable accounting guidance) in Corvid Peak is obtained.

*(in thousands, except share data)*

Pursuant to the Transition Services Agreement, Tiptree and Corvid Peak have mutually agreed to provide certain services to one another (the Services). At the present time, the Services consist primarily of Tiptree providing to Corvid Peak office space, legal and compliance services, information technology services, insurance coverage, and certain finance, accounting and tax services. The Services are provided on arms'-length terms. The effective date of the Transition Services Agreement is January 1, 2019.

The Transition Services Agreement will terminate upon a change of control of Corvid Peak. Corvid Peak may terminate any Services upon 30 days written notice and Tiptree may terminate any Services upon 150 days written notice, but Tiptree may not terminate any Services prior to June 30, 2020.

Management fees and payments under the Transition Services Agreement and in the six months ended June 30, 2019 and 2018 were not material.

### **(23) Subsequent Events**

On August 1, 2019, the Company's board of directors declared a quarterly cash dividend of \$0.04 per share to holders of Common Stock with a record date of August 19, 2019, and a payment date of August 26, 2019.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Our Management's Discussion and Analysis of Financial Conditions and Results of Operations is presented in this section as follows:

- Overview
- Results of Operations
- Non-GAAP Reconciliations
- Liquidity and Capital Resources
- Critical Accounting Policies and Estimates
- Off-Balance Sheet Arrangements

### OVERVIEW

Tiptree is a holding company that combines insurance operations with investment management capabilities. Our principal operating subsidiary is a leading provider of specialty insurance products and related services. We also allocate capital across a broad spectrum of businesses, assets and other investments, which we refer to as Tiptree Capital. When considering capital allocation decisions, we take a diversified approach with a longer-term investment horizon. We evaluate our performance primarily by the comparison of our shareholder's long-term total return on capital, as measured by Adjusted EBITDA, Operating EBITDA and growth in book value per share plus dividends.

Year-to-date 2019, we executed on several strategic initiatives:

#### Overall:

- Delivered a year-to-date return of 7.0%, as measured by growth in book value per share plus dividends paid.
- Year-to-date 2019, we purchased and retired 1,472,730 shares of our Common Stock for \$9.1 million through open market purchases and block purchases.
- Increased our quarterly dividend for the third consecutive year to \$0.04 per share, a 14.3% increase over the prior year.

#### Insurance:

- Gross written premiums for year-to-date 2019 were \$461.0 million, up 17.0% from the prior year. Net written premiums were \$274.6 million, up 34.0%, driven by growth in all product lines.
- Within our insurance investment portfolio, we reduced our exposure to levered credit by selling approximately \$110.0 million of assets and repaying asset-based debt.

#### Tiptree Capital:

- In 2019, began re-positioning our asset management platform, by agreeing to invest \$75 million to seed new investment funds in Corvid Peak (formerly known as Tricadia).
- On April 22, 2019, we sold our CLO management business (Telos Asset Management) for an approximate \$7.6 million pre-tax gain and a future contingent earn-out.

Our results of operations are affected by a variety of factors including, but not limited to, general economic conditions and GDP growth, market liquidity and volatility, consumer confidence, U.S. demographics, employment and wage growth, business confidence and investment, inflation, interest rates and spreads, the impact of the regulatory environment, and the other factors set forth in Item 1A. "Risk Factors" in our 10-K. Generally, our businesses are positively affected by a healthy U.S. consumer, stable to gradually rising interest rates, stable markets and business conditions, and global growth and trade flows. Conversely, rising unemployment, volatile markets, rapidly rising interest rates, changing regulatory requirements and slowing business conditions can have a material adverse effect on our results of operations or financial condition.

Our specialty insurance business generally focuses on products which have low severity but high frequency loss experiences and are short-duration. Our insurance business has historically generated significant fee based revenues. In general, the types of products we offer tend to have limited aggregation risk, and thus, limited exposure to catastrophic and residual risk. We mitigate our underwriting risk through a combination of reinsurance and retrospective commission structures with our distribution partners and/or third-party reinsurers. Our insurance results primarily depend on our pricing, underwriting, risk retention and the accuracy of reserves, reinsurance arrangements, returns on invested assets, and policy and contract renewals and run-off. While our insurance operations have historically maintained a relatively stable combined ratio which support steady earnings, our initiatives to change our business mix along with economic factors could generate different results than we have historically experienced. We believe there are additional growth opportunities to expand our warranty and specialty programs insurance business model to other niche products and markets.

Our insurance company investment portfolio primarily serves as a source to pay claims and secondarily as a source of income for our operations. Our investments include fixed maturity securities, loans, credit investment funds, equity securities, real estate and CLOs. Many of our investments are held at fair value. Changes in fair value for loans, credit investment funds, equity securities and CLO assets and liabilities are reported quarterly as unrealized gains or losses in revenues and can be impacted by changes in interest rates, credit risk, or market risk, including specific company or industry factors. Our equity holdings are relatively concentrated. General equity market trends, along with company and industry specific factors, can impact the fair value of our holdings and can result in unrealized gains and losses affecting our results. In addition, both as part of our insurance company investments and separately in Tiptree Capital, as of February 1, 2018, common shares of Invesque represent a significant asset on our balance sheet. Any change in the fair value of Invesque's common stock or Invesque's dividend policy could have a significant impact on our financial condition and results of operations.

The shipping industry is highly competitive and fragmented. Demand for shipping capacity is a function of world economic conditions and the related demand for commodities, production and consumption patterns, as well as events, which interrupt production, trade routes, and consumption. The shipping industry is cyclical with high volatility in charter hire rates and profitability. General global economic conditions, along with company and industry specific factors, can impact the fair value of our vessels and their operating results.

Our business can also be impacted in various ways by changes in interest rates, which can result in fluctuations in fair value of our investments, revenues associated with floating rate loans, volume and revenues in our mortgage business and interest expense associated with floating rate debt used to fund many of our operations.

## RESULTS OF OPERATIONS

The following is a summary of our consolidated financial results for the three and six months ended June 30, 2019 and 2018. In addition to GAAP results, management uses the Non-GAAP measures Operating EBITDA, Adjusted EBITDA and book value per share as measurements of operating performance. Management believes these measures provide supplemental information useful to investors as they are frequently used by the financial community to analyze financial performance, debt service and comparison among companies. Management uses Operating EBITDA as part of its capital allocation process and to assess comparative returns on invested capital. Adjusted EBITDA is also used in determining incentive compensation for the Company's executive officers. The Company defines Adjusted EBITDA as GAAP net income of the Company adjusted (i) to add back corporate interest expense, consolidated income taxes and consolidated depreciation and amortization expense, (ii) for the effect of purchase accounting, (iii) for non-cash fair value adjustments, and (iv) for any significant non-recurring expenses. Operating EBITDA represents Adjusted EBITDA plus stock based compensation expense, less realized and unrealized gains and losses and less third party non-controlling interests. Operating EBITDA and Adjusted EBITDA are not measurements of financial performance or liquidity under GAAP and should not be considered as an alternative or substitute for GAAP net income. See "Non-GAAP Reconciliations" for a reconciliation of these measures to their GAAP equivalents.

(2) For periods prior to April 10, 2018, book value per share assumed full exchange of the limited partners units of TFP for Common Stock.

### Revenues

For the three months ended June 30, 2019, revenues were \$191.1 million, which increased \$38.4 million, or 25.1%, over the prior year period. For the six months ended June 30, 2019, revenues were \$375.0 million, which increased \$74.2 million, or 24.7%, over the prior year period. The increase for both periods was primarily driven by growth in earned premiums, service

and administrative fees, and realized and unrealized gains on Invesque and the gain on sale of our CLO management business. Earned premiums were \$235.5 million for the six months ended June 30, 2019, up from \$201.7 million in the comparable 2018 period driven by growth in net written premiums. The combination of unearned premiums and deferred revenues on the balance sheet grew by \$136.1 million, or 23.1%, from June 30, 2018 to June 30, 2019 as a result of increased written premiums in credit protection, warranty and other specialty programs.

*Income (loss) before taxes (from continuing and discontinued operations)*

The table below highlights key drivers impacting our consolidated results on a pre-tax basis. Many of our investments are carried at fair value and marked to market through unrealized gains and losses. As a result, we expect our earnings relating to these investments to be relatively volatile between periods in contrast to our fixed income securities, which are marked to market through accumulated other comprehensive income ("AOCI") in stockholders equity. On February 1, 2018, we sold our senior living operations to Invesque in exchange for a net of 16.6 million shares of Invesque common stock which resulted in a pre-tax gain on sale of \$56.9 million in 2018, of which \$46.2 million was recorded in the six months ended June 30, 2018.

(\$ in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2019	2018	2019	2018
Net realized and unrealized gains (losses) <sup>(1)</sup>	\$ 12.4	\$ (3.8)	\$ 16.4	\$ (6.0)
Discontinued operations (Care) <sup>(2)</sup>	\$ —	\$ —	\$ —	\$ 46.8

(1) Excludes Mortgage realized and unrealized gains and losses - Performing and NPLs. Three months ended June 30, 2019 includes \$7.6 million gain on sale of the CLO business.

(2) Represents Care for the three months ended March 31, 2018 including a \$46.2 million pre-tax gain on sale.

*Net Income (Loss) before non-controlling interests*

For the three months ended June 30, 2019, net income before non-controlling interests was \$12.2 million compared to \$0.9 million in the 2018 period, an increase of \$11.3 million. The increase was driven by improved insurance operating performance and increased realized and unrealized gains on investments within Tiptree Capital and our insurance investment portfolio.

For the six months ended June 30, 2019, net income before non-controlling interests was \$16.5 million compared to \$29.9 million in the 2018 period, a decrease of \$13.4 million. The decrease was driven by the non-repeat gain on sale of Care, which occurred in 2018, partially offset by improved insurance operating performance and increased realized and unrealized gains on investments within Tiptree Capital and our insurance investment portfolio.

*Net Income (Loss) Available to Common Stockholders*

For the three months ended June 30, 2019, net income available to Common Stockholders was \$11.7 million, an increase of \$10.9 million from the prior year period. For the six months ended June 30, 2019, net income available to Common Stockholders was \$15.7 million, a decrease of \$8.7 million from the prior year period. The key drivers of net income available to Common Stockholders were the same factors which impacted the net income before non-controlling interests.

*Operating and Adjusted EBITDA - Non-GAAP*

Operating EBITDA for the three months ended June 30, 2019 was \$12.7 million compared to \$15.0 million for the 2018 period, a decrease of \$2.3 million, or 15.3%. For the three month period, the decline was driven by the re-balancing of our investment portfolio with a higher portion held in cash. Operating EBITDA for the six months ended June 30, 2019 was \$25.3 million compared to \$23.9 million for the 2018 period, an increase of \$1.4 million, or 5.9%. For the six month period, the key drivers of the increase were driven by improved performance in Tiptree Capital.

Adjusted EBITDA for the three months ended June 30, 2019 was \$22.9 million compared to \$10.1 million for the 2018 period. Adjusted EBITDA for the six months ended June 30, 2019 was \$37.5 million compared to \$15.5 million for the 2018 period. The key drivers of the increase were net unrealized gains on investments in the insurance portfolio and in Tiptree Capital. See "— Non-GAAP Reconciliations" for a reconciliation to GAAP net income.

*Book Value per share - Non-GAAP*

Total stockholders' equity was \$407.1 million as of June 30, 2019 compared to \$400.8 million as of June 30, 2018, primarily driven by net income, partially offset by share repurchases and dividends paid. Over the past twelve months, Tiptree returned \$19.5 million to shareholders through share repurchases and dividends paid. Book value per share for the period ended June 30,

2019 was \$11.47, an increase from book value per share of \$10.74 as of June 30, 2018. The key drivers of the period-over-period impact were earnings per share and the purchase of 1.5 million shares at an average 40% discount to book value. Those increases were partially offset by dividends paid of \$0.145 per share and officer compensation share issuances.

## Results by Segment

Tiptree is a holding company that combines insurance operations with investment management capabilities. Our principal operating subsidiary is a leading provider of specialty insurance products and related services. We also allocate capital across a broad spectrum of businesses, assets and other investments, which we refer to as Tiptree Capital. We classify our business into one reportable segment, specialty insurance, with the remainder of our non-insurance operations aggregated into Tiptree Capital. For the year ended December 31, 2018, Mortgage and Asset Management, which previously were reportable segments, no longer met the quantitative threshold for disclosure. Those are now reported in Other, which we refer to as Tiptree Capital. Prior year segments have been conformed to the current year presentation. Corporate activities include holding company interest expense, employee compensation and benefits, and other expenses. The following table presents the components of total pre-tax income including continuing and discontinued operations.

## Invested Capital, Total Capital and Operating EBITDA - Non-GAAP<sup>(1)</sup>

Management evaluates the return on Invested Capital and Total Capital, which are non-GAAP financial measures, when making capital decisions. Invested Capital represents its total equity investment, including any re-investment of earnings, and acquisition costs, net of tax. Total Capital represents Invested Capital plus Corporate Debt. Management believes the use of these financial measures provide supplemental information useful to investors as they are frequently used by the financial community to analyze how the Company has allocated capital over-time and provide a basis for determining the return on capital to shareholders. Management uses both of these measures when making capital decisions, including reinvesting cash, and evaluating the relative performance of its businesses and investments. The following tables present the components of Invested Capital, Total Capital, Operating EBITDA and Adjusted EBITDA.

(3) Excludes Mortgage realized and unrealized gains and losses - Performing and NPLs.

(4) Removes the Operating EBITDA associated with third party non-controlling interests. Does not remove the non-controlling interests related to employee based shares.

**Specialty Insurance**

Our principal operating subsidiary is a provider of specialty insurance products and related services, including credit protection insurance, warranty products, and insurance programs which underwrite niche personal and commercial lines of insurance. We also offer fee-based administration and fronting services for our self-insured clients who own captive producer owned reinsurance companies (“PORCs”). We generate income from insurance underwriting operations and our investment portfolio. Insurance underwriting revenues are primarily generated from net earned premiums, service and administrative fees and ceding commissions. We measure insurance underwriting operations performance by underwriting margin, combined ratio and Operating EBITDA. The investment portfolio income consists of investment income, gains and losses and is measured by net portfolio income.

The following tables present the specialty insurance segment results for the three and six months ended June 30, 2019 and 2018.

## Results

Our specialty insurance operations are currently expanding product lines in an effort to increase written premiums, and commensurately grow the insurance portfolio. As part of this process, the business is investing to grow warranty and other specialty programs, while maintaining a leading position in our credit protection markets. That, combined with the earnings performance of the investment portfolio, are key drivers in comparing 2019 versus 2018 results. The growth in written premiums, combined with higher retention in select products, has resulted in an increase of unearned premiums and deferred revenue on the balance sheet of 23.1% from \$590.1 million as of June 30, 2018 to \$726.2 million as of June 30, 2019.

Pre-tax income was \$12.0 million for the three months ended June 30, 2019, an increase of \$3.3 million, over the prior year period. The primary drivers of the increase were net realized and unrealized gains of \$3.7 million in the 2019 period versus \$1.4 million of net realized and unrealized gains in the 2018 period, primarily related to equities and loans held at fair value in the portfolio. Insurance underwriting operations results improved versus the prior year period, driven primarily by increased underwriting margin of \$4.2 million.

Pre-tax income was \$20.1 million for the six months ended June 30, 2019, an increase of \$10.0 million, over the prior year period. The primary drivers of the increase were net realized and unrealized gains of \$5.8 million in the 2019 period versus \$2.0 million of losses in the 2018 period, primarily related to equities and loans held at fair value in the portfolio. Insurance underwriting operations results improved versus the prior year period, driven primarily by increased underwriting margin of \$6.7 million, which was partially offset by increased other expenses of \$3.2 million primarily associated with debt extinguishment expenses on asset-based debt. Interest expense decreased by \$1.5 million from the prior year period, primarily associated with a reduction of asset-based debt on consolidated loan funds within the investment portfolio.

## Revenues

Revenues are generated by the sale of the following products: credit protection, warranty, other specialty programs, services and other. Credit protection products include credit life, credit disability, credit property, involuntary unemployment, and accidental death and dismemberment. Warranty products include vehicle service contracts, furniture and appliance service contracts and mobile device protection. Other specialty programs are primarily personal and commercial lines and other property-casualty products.

For the three months ended June 30, 2019, total revenues were \$154.4 million, up \$20.3 million, or 15.1%, primarily driven by an increase in earned premiums of \$16.4 million and increases in service and administrative fees of \$1.8 million. The increase in earned premiums was driven by growth in credit, warranty and other specialty product lines. For the three months ended June 30, 2019, revenues on the investment portfolio contributed \$7.1 million compared to \$6.3 million in the 2018 period, an increase of \$0.8 million.

For the six months ended June 30, 2019, total revenues were \$309.0 million, up \$44.9 million, or 17.0%, primarily driven by an increase in earned premiums of \$33.8 million and increases in service and administrative fees of \$3.1 million. The increase in earned premiums was driven by growth in credit, warranty and other specialty product lines. For the six months ended June 30, 2019, revenues on the investment portfolio contributed \$13.5 million compared to \$7.1 million in the 2018 period, an increase of \$6.4 million. See “—Specialty Insurance Investment Portfolio” for further discussion of the investment results.

## Expenses

Total expenses include policy and contract benefits, commissions expense and operating expenses. For the three months ended June 30, 2019, total expenses were \$142.4 million compared to \$125.4 million in the 2018 period. For the six months ended June 30, 2019, total expenses were \$288.9 million compared to \$254.0 million in the 2018 period. The primary drivers of the increase were policy and contract benefits and commission expense as written premiums and insurance revenues increased over the 2018 period.

There are two types of expenses for claims under insurance and warranty service contracts included in policy and contract benefits which are member benefit claims and net losses and loss adjustment expenses. Member benefit claims represent the costs of services and replacement devices incurred in warranty protection and car club service contracts. Net losses and loss adjustment expenses represent actual insurance claims paid, changes in unpaid claim reserves, net of amounts ceded, and the costs of administering claims for credit life and other insurance lines. Incurred claims are impacted by loss frequency, which is a measure of the number of claims per unit of insured exposure, and loss severity, which is based on the average size of claims. Loss occurrences in our insurance products are characterized by low severity and high frequency. Factors affecting loss frequency and loss severity include the volume of underwritten contracts, changes in claims reporting patterns, claims settlement patterns,

judicial decisions, economic conditions, morbidity patterns and the attitudes of claimants towards settlements.

For the three months ended June 30, 2019, policy and contract benefits were \$39.5 million, up \$5.3 million from the prior year. For the six months ended June 30, 2019, policy and contract benefits were \$80.3 million, up \$9.5 million, primarily as a result of growth in earned premiums.

Commission expense is incurred on most product lines, the majority of which are retrospective commissions paid to distributors and retailers selling our products, including credit insurance policies, warranty and mobile device protection service contracts, and motor club memberships. Credit insurance commission rates are, in many cases, set by state regulators and are also impacted by market conditions and retention levels.

For the three months ended June 30, 2019, total commission expense was \$72.7 million compared to \$62.6 million in the 2018 period. Total commission expense for the six months ended June 30, 2019 was \$147.6 million compared to \$125.2 million in the 2018 period. The primary drivers of the increase in both periods were the commission expense associated with the growth in written premiums.

Operating expenses include employee compensation and benefits, interest expense, depreciation and amortization expenses and other expenses. For the three months ended June 30, 2019, employee compensation and benefits were \$12.1 million, up \$1.0 million. For the six months ended June 30, 2019, employee compensation and benefits were \$24.1 million, up \$2.1 million, driven by increased compensation associated with warranty and program products. Interest expense of \$7.6 million in 2019 decreased by \$1.5 million versus the prior year period, primarily from reduced asset based borrowings on certain investments within the investment portfolio. Other expenses for the six months ended June 30, 2019 were \$24.7 million, up \$3.2 million from 2018 primarily from debt extinguishment expenses associated with the asset-based debt. Depreciation and amortization expense was lower period-over-period as a result of the decline in VOBA purchase accounting impact from the amortization of the fair value attributed to the insurance policies and contracts acquired.

## Key Operating Metrics and Non-GAAP Operating Results

### Gross & Net Written Premiums

Gross written premiums represents total premiums from insurance policies and warranty service contracts written during a reporting period. Net written premiums are gross written premiums less that portion of premiums ceded to third-party reinsurers or PORCs. The amount ceded is based on the individual reinsurance agreements. Net earned premiums are the earned portion of our net written premiums. At the end of each reporting period, premiums written that are not earned are classified as unearned premiums, which are earned in subsequent periods over the remaining term of the policy.

Total gross written premiums for the three months ended June 30, 2019 were \$262.6 million, which represented an increase of \$69.1 million, or 35.7%, from the prior year period. The increase was driven by growth in both credit and warranty products. Total net premiums written for the three months ended June 30, 2019 were \$153.6 million, up \$57.8 million, or 60.3%, driven primarily by growth in all programs.

Total gross written premiums for the six months ended June 30, 2019 were \$461.0 million, which represented an increase of \$66.9 million, or 17.0%, from the prior year period. The increase was driven by growth in credit and warranty programs. The amount of business retained was 59.6%, up from 52.0% in the prior year period. Total net premiums written for the six months ended June 30, 2019 were \$274.6 million, up \$69.6 million, or 34.0%, driven by growth in all products. We believe our warranty service contracts and light commercial programs provide opportunity for growth through expanded product offerings, new clients and geographic expansion.

### Product Underwriting Margin - Non-GAAP

The following table presents product specific revenue and expenses within the specialty insurance segment. We generally limit the underwriting risk we assume using both reinsurance (e.g., quota share and excess of loss) and retrospective commission agreements with our partners (e.g., commissions paid are adjusted based on the actual underlying losses incurred), which manage and mitigate our risk. Period-over-period comparisons of revenues and expenses are often impacted by the PORCs and distribution partners choice as to whether to retain risk, specifically service and administration expenses and ceding commissions, both components of revenue, and policy and contract benefits and commissions paid to our partners and reinsurers. Generally, when losses are incurred, the risk which is retained by our partners and reinsurers is reflected in a reduction in commissions paid. In order to better explain to investors the net financial impact of the risk retained by the Company of the insurance contracts written and the impact on profitability, we use the Non-GAAP metric - Underwriting Margin.

(1) For further information relating to the Company's underwriting margin, including a reconciliation to GAAP financials, see "—Non-GAAP Reconciliations."

For the three months ended June 30, 2019, underwriting margin was \$35.1 million, up \$4.2 million from the prior year period driven by increases in credit protection and warranty products.

Underwriting margin for the six months ended June 30, 2019 was \$67.6 million, up from \$60.9 million in the 2018 period. Credit protection underwriting margin was \$42.0 million, an increase from the 2018 period of \$5.4 million, or 14.8%. Credit protection products continue to provide opportunities for steady growth through a combination of expanded product offerings and new clients. Underwriting margin for warranty products was \$16.4 million for the 2019 period, up \$2.9 million, or 21.5%, from the prior year period. The improvement was driven primarily by growth in furniture, appliances, and auto warranty products. Specialty programs underwriting margin for the six months ended June 30, 2019 was \$4.3 million, down 32.8% from 2018, as certain non-standard auto programs were discontinued. Services and other contributed \$4.9 million in six months ended June 30, 2019, which was relatively stable as compared to 2018.

### Invested Capital, Total Capital, Operating EBITDA and Insurance Operating Ratios

We use the combined ratio as an operating metric to evaluate our insurance underwriting performance, both overall and relative to peers. Expressed as a percentage, it represents the relationship of policy and contract benefits, commission expense (net of ceding commissions), employee compensation and benefits, and other expenses to net earned premiums, service and administrative fees, and other income. Investors use this ratio to evaluate our ability to profitably underwrite the risks we assume over time and manage our operating costs. A combined ratio less than 100% indicates an underwriting profit, while a combined ratio greater than 100% reflects an underwriting loss. The below table outlines the insurance operating ratios, capital invested and the drivers of Operating EBITDA split between underwriting and investments as management evaluates the return on the investment portfolio separately from the returns from underwriting activities.

(1) For further information relating to the Company's Operating EBITDA, Invested and Total Capital, adjusted combined ratio, and Net Portfolio Income (Loss), including a reconciliation to GAAP financials, see "—Non-GAAP Reconciliations."

For the three months ended June 30, 2019, the combined ratio was 92.7% compared to 92.3% for the prior year period. The combined ratio was 93.2% for the six months ended June 30, 2019, compared to 93.1% for the prior year period. The combined ratio from 2015 (the first full year after acquiring Fortegra) to 2018 averaged 91.0%. The increase from our four-year average in recent quarters has been driven primarily by our investment in new products and geographies which we believe will result in premium growth in future periods. See "—Insurance Investment Portfolio" for further discussion of the investment results and "—Non-GAAP Reconciliations" for a reconciliation to GAAP pre-tax income.

### Insurance Investment Portfolio

Our investment portfolio is subject to different regulatory considerations, including with respect to types of assets, concentration limits, affiliate transactions and the use of leverage. Our investment strategy is designed to achieve attractive risk-adjusted returns over the entire investment horizon across select asset classes, sectors and geographies while maintaining adequate liquidity to meet our claims payment obligations. As such, volatility from realized and unrealized gains and losses may impact period-over-period performance. Unrealized gains and losses on equity securities and loans held at fair value impact current period net income, while unrealized gains and losses on available for sale securities impact AOCI.

In managing our investment portfolio, we analyze net investments and net portfolio income, which are non-GAAP measures. Our presentation of net investments equals total investments plus cash and cash equivalents minus asset based financing related to certain investments. Our presentation of net portfolio income equals net investment income plus realized and unrealized gains and losses, excluding unrealized gains and losses on securities which are taken to AOCI, and minus interest expense associated with asset based financing of investments. Net investments and net portfolio income are used to calculate average annualized yield, which is one of the measures management uses to analyze the profitability of our investment portfolio. Management believes this information on a cumulative basis is useful since it allows investors to evaluate the performance of our investment portfolio based on the capital at risk and on a non-consolidated basis. Our calculation of net investments and net portfolio income may differ from similarly titled non-GAAP financial measures used by other companies. Net investments and net portfolio income are not measures of financial performance or liquidity under GAAP and should not be considered a substitute for total investments or net investment income. See "—Non-GAAP Reconciliations" for a reconciliation to GAAP total investments and investment income.

(1) Average Annualized Yield % represents the ratio of annualized net investment income, realized and unrealized gains (losses) less investment portfolio interest expense to the average of the prior two quarters total investments less investment portfolio debt plus cash, but does not reflect the cumulative return on the portfolio.

Net investments of \$488.7 million have grown 19.2% from June 30, 2018 through a combination of organic growth in written premiums and increased retention.

Our net investment income includes interest and dividends, net of investment expenses, on our invested assets. Our loans, at fair value, are generally floating rate and therefore earn LIBOR plus a spread. Generally, our interest income on those loans will increase in a rising interest rate environment, or decrease in a declining rate environment, subject to any LIBOR floors. Our held to maturity investments generally carry fixed coupons, which can impact our returns on investment. We report net realized gains and losses on our investments separately from our net investment income. Net realized gains occur when we sell our investment securities for more than their costs or amortized costs, as applicable. Net realized losses occur when we sell our investment securities for less than their costs or amortized costs, as applicable, or we write down the investment securities as a result of other-than-temporary impairment. We report net unrealized gains and losses on securities classified as available-for-sale separately within accumulated other comprehensive income on our balance sheet. For loans, at fair value, and equity securities, we report unrealized gains and losses within net realized gains and losses on investment on the consolidated statement of income.

For the six months ended June 30, 2019, the net investment portfolio income was \$12.9 million compared to \$4.7 million in the comparable 2018 period. Net investment income was \$7.7 million, down \$1.4 million, or 15.4% from 2018, driven primarily by our efforts to reduce exposure to levered credit through the sale of loans held at fair value, as mentioned earlier. For the six months ended June 30, 2019, fair market value changes on equities resulted in unrealized and realized gains of \$5.4 million compared to losses of \$3.2 million in the 2018 period. The average annualized yield for the year improved from 2.4% in 2018 to 5.4% in 2019. The improvement was a result of lower asset-based interest expense, and unrealized gains compared to unrealized losses in the prior year.

## Tiptree Capital

Tiptree Capital consists of our non-insurance operating businesses and investments. As of June 30, 2019, Tiptree Capital includes our asset management, mortgage and shipping operations, and other investments (including our Invesque shares). We manage Tiptree Capital on a total return basis, balancing current cash flow and long-term value appreciation.

The following table summarizes total revenues, pre-tax income from continuing and discontinued operations from Tiptree Capital.

(2) Discontinued operations related to Care for the six months ended June 30, 2018 includes \$46.2 million pre-tax gain on sale of Care.

### Results from Continuing Operations

Tiptree Capital earns revenues from net interest income; mortgage gains and fees; management fees from CLOs under management; and distributions and realized and unrealized gains on the Company's investment holdings (primarily Invesque).

Revenues for the three months ended June 30, 2019 were \$36.7 million, an increase of \$18.1 million from the prior year period. Pre-tax income from continuing operations for the three months ended June 30, 2019 was \$11.7 million compared to a loss of \$0.5 million in the 2018 period. The primary driver of improvement was unrealized gains on our Invesque shares in the 2019 period versus unrealized losses in the prior year period and the gain on sale of our CLO business. For the three months ended June 30, 2019, we received \$2.6 million of dividends from Invesque and recorded \$3.0 million of unrealized gains compared to \$2.5 million of dividends and \$2.7 million of unrealized losses in the 2018 period. Additionally, pre-tax income from our shipping operations improved by \$0.3 million period-over-period primarily driven by increased revenues.

Revenues for the six months ended June 30, 2019 were \$66.0 million, an increase of \$29.3 million from the prior year period. Pre-tax income from continuing operations for the six months ended June 30, 2019 was \$17.6 million, compared to a loss of \$2.2 million in the 2018 period. The primary driver of improvement in Pretax Income for the six month period was the same as that which impacted the three month period plus improvement in our shipping operations. For the six months ended June 30, 2019, we received \$5.1 million of dividends from Invesque and \$5.1 million of unrealized gains compared to \$4.2 million of dividends and \$5.8 million of unrealized losses in the 2018 period. Additionally, pre-tax income from our shipping operations improved by \$1.6 million period-over-period primarily driven by increased revenues and non-repeat start-up expenses impacting the 2018 period.

### Results from Discontinued Operations

Discontinued Operations includes the results from Care, previously reported in the Senior Living segment. In the six months ended June 30, 2018, pre-tax income was \$46.8 million which included a \$46.2 million gain on sale of Care.

**Invested Capital**

Invested Capital increased from \$163.7 million as of June 30, 2018 to \$177.5 million as of June 30, 2019. On February 1, 2018, we completed the sale of Care to Invesque. We received consideration of 16.6 million shares of which 13.7 million shares are held as equity securities in Tiptree Capital, and 2.9 million shares are held in the insurance investment portfolio. In 2018, we invested approximately \$50 million into three unlevered vessels which are reported in other investments. As a result of the investments in Tiptree Capital and capital returned to shareholders in 2018 and early 2019, cash held at Tiptree corporate decreased from \$62.0 million as of June 30, 2018 to \$27.6 million as of June 30, 2019.

**Operating EBITDA**

For the six months ended June 30, 2019, Operating EBITDA increased from \$6.9 million in the 2018 period to \$8.3 million in the 2019 period. The key drivers of Operating EBITDA were the same factors which impacted pre-tax income excluding the impact of the increased depreciation on our shipping investments. See “—Non-GAAP Reconciliations” for a reconciliation to GAAP net income.

Corporate expenses include expenses of the holding company for interest, employee compensation and benefits, and other costs. Corporate employee compensation and benefits includes the expense of management, legal and accounting staff. Other expenses primarily consisted of audit and professional fees, insurance, office rent and other related expenses.

For the three months ended June 30, 2019, total expenses were \$7.9 million, up \$1.2 million, primarily driven by an increase in employee incentive compensation, which was partially offset by decreased employee compensation and benefits.

Employee compensation and benefits, including incentive compensation expense, increased \$0.9 million for the six months ended June 30, 2019 compared to the 2018 period, driven by employee incentive expenses. Interest expense for the six months ended June 30, 2019 was \$3.2 million, an increase of \$1.4 million driven by increased average borrowings and higher LIBOR. As of June 30, 2019, the outstanding borrowings were \$70.2 million compared to \$74.0 million at June 30, 2018. Other expenses were \$5.1 million for the 2019 period as compared to \$4.1 million in 2018. The period-over-period increase was driven by increased rent expense and \$0.6 million of transaction related expenses.

## Provision for income taxes

### Provision for income taxes - Total Operations

The total income tax expense of \$4.4 million for the six months ended June 30, 2019 and total income tax expense of \$11.5 million for the six months ended June 30, 2018 are reflected as components of net income (loss). For the six months ended June 30, 2019, the Company's effective tax rate was equal to 20.9%. The effective rate for the six months ended June 30, 2019 is slightly lower than the U.S. federal statutory income tax rate of 21%, primarily from the impact of the dividends received deduction and other discrete items, largely offset by state taxes and the impact of foreign operations. For the six months ended June 30, 2018, the Company's effective tax rate was equal to 27.7%. The effective rate for the six months ended June 30, 2018 is higher than the U.S. federal statutory income tax rate of 21%, primarily from state taxes on the gain on sale of Care.

### Provision for income taxes - Continuing Operations

The Company had a tax expense from continuing operations of \$4.4 million for the six months ended June 30, 2019 as compared to a tax benefit from continuing operations of \$0.9 million for the six months ended June 30, 2018. The effective tax rate on income from continuing operations for the six months ended June 30, 2019 was approximately 20.9% compared to 15.9% for the six months ended June 30, 2018. Differences from the U.S. federal statutory income tax rate for the six months ended June 30, 2019 and 2018 are primarily the result of the dividends received deduction offset by other discrete items.

## Balance Sheet Information - as of June 30, 2019 compared to the year ended December 31, 2018

Tiptree's total assets were \$1,920.4 million as of June 30, 2019, compared to \$1,864.9 million as of December 31, 2018. The \$55.5 million increase in assets is primarily attributable to the growth in the insurance company.

Total stockholders' equity was \$407.1 million as of June 30, 2019, compared to \$399.3 million as of December 31, 2018, primarily driven by net income, which was partially offset by stock repurchases and dividends. As of June 30, 2019, there were 34,540,432 shares of Common Stock outstanding as compared to 35,870,348 as of December 31, 2018.

## NON-GAAP RECONCILIATIONS

### Adjusted EBITDA and Operating EBITDA - Non-GAAP

The Company defines Adjusted EBITDA as GAAP net income of the Company adjusted to add (i) corporate interest expense, consolidated income taxes and consolidated depreciation and amortization expense, (ii) adjust for the effect of purchase accounting, (iii) adjust for non-cash fair value adjustments, and (iv) any significant non-recurring expenses. Operating EBITDA represents Adjusted EBITDA plus stock based compensation expense, less realized and unrealized gains and losses and less third party non-controlling interests. Operating EBITDA and Adjusted EBITDA are not measurements of financial performance or liquidity under GAAP and should not be considered as an alternative or substitute for GAAP net income.

- (1) Corporate Debt interest expense includes Secured corporate credit agreements, junior subordinated notes and preferred trust securities. Interest expense associated with asset-specific debt in specialty insurance and asset management, mortgage and other operations is not added-back for Adjusted EBITDA and Operating EBITDA.
- (2) Represents total depreciation and amortization expense less purchase accounting amortization related adjustments at the Insurance Company. Following the purchase accounting adjustments, current period expenses associated with deferred costs were more favorably stated and current period income associated with deferred revenues were less favorably stated. Thus, the purchase accounting effect related to our Insurance company increased EBITDA above what the historical basis of accounting would have generated.
- (3) For our specialty insurance operations, depreciation and amortization on senior living real estate that is within net investment income is added back to Adjusted EBITDA. For Care (Discontinued Operations), the reduction in EBITDA is related to accumulated depreciation and amortization, and certain operating expenses, which were previously included in Adjusted EBITDA in prior periods.
- (4) Acquisition, start-up and disposition costs including debt extinguishment, legal, taxes, banker fees and other costs. In 2018, includes payments pursuant to a separation agreement, dated November 10, 2015.
- (5) Adjustment excludes Mortgage realized and unrealized gains and losses - Performing and NPLs as those are recurring in nature and align with those business models.
- (6) Removes the Operating EBITDA associated with third party non-controlling interests. Does not remove the non-controlling interests related to employee based shares.

The footnotes below correspond to the tables above, under “—Adjusted EBITDA and Operating EBITDA - Non-GAAP”

- (1) Includes discontinued operations related to Care. For more information, see “Note—(3) Dispositions, Assets Held for Sale & Discontinued Operations.”
- (2) Corporate Debt interest expense includes Secured corporate credit agreements, junior subordinated notes and preferred trust securities. Interest expense associated with asset-specific debt in specialty insurance and asset management, mortgage and other operations is not added-back for Adjusted EBITDA and Operating EBITDA.
- (3) Represents total depreciation and amortization expense less purchase accounting amortization related adjustments at the Insurance Company. Following the purchase accounting adjustments, current period expenses associated with deferred costs were more favorably stated and current period income associated with deferred revenues were less favorably stated. Thus, the purchase accounting effect related to our Insurance company increased EBITDA above what the historical basis of accounting would have generated.
- (4) For our specialty insurance operations, depreciation and amortization on senior living real estate that is within net investment income is added back to Adjusted EBITDA. For Care (Discontinued Operations), the reduction in EBITDA is related to accumulated depreciation and amortization, and certain operating expenses, which were previously included in Adjusted EBITDA in prior periods.
- (5) Acquisition, start-up and disposition costs including debt extinguishment, legal, taxes, banker fees and other costs. In 2018, includes payments pursuant to a separation agreement, dated November 10, 2015.
- (6) Adjustment excludes Mortgage realized and unrealized gains and losses - Performing and NPLs as those are recurring in nature and align with those business models.
- (7) Removes the Operating EBITDA associated with third party non-controlling interests. Does not remove the non-controlling interests related to employee based shares.

### Book Value per share - Non-GAAP

Management believes the use of this financial measure provides supplemental information useful to investors as book value is frequently used by the financial community to analyze company growth on a relative per share basis. The following table provides a reconciliation between total stockholders' equity and total shares outstanding, net of treasury shares.

(\$ in millions, except per share information)

	As of June 30,	
	2019	2018
Total stockholders' equity	\$ 407.1	\$ 400.8

### Specialty Insurance - Underwriting Margin - Non-GAAP

Underwriting margin is a measure of the underwriting profitability of our specialty insurance operations. It represents net earned premiums, service and administrative fees, ceding commissions and other income less policy and contract benefits and commission expense. We use the combined ratio as an insurance operating metric to evaluate our underwriting performance, both overall and relative to peers. Expressed as a percentage, it represents the relationship of policy and contract benefits, commission expense (net of ceding commissions), employee compensation and benefits, and other expenses to net earned premiums, service and administrative fees, and other income. The following table provides a reconciliation between underwriting margin and pre-tax income for the following periods:

(\$ in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2019	2018	2019	2018

#### Specialty Insurance Investment Portfolio - Non-GAAP

The following table provides a reconciliation between total investments and net investments for the following periods:

(\$ in millions)	As of June 30,	
	2019	2018
Total Investments	\$ 364.7	\$ 482.5

Liability due to brokers <sup>(3)</sup>	(20.2)	(6.8)
<b>Net investments - Non-GAAP</b>	<b>\$ 488.7</b>	<b>\$ 410.1</b>

(1) Consists of asset-based financing on loans including certain credit investments, see Note—(10) Debt, net for further details.

(2) Restricted cash available to invest within certain credit investment funds which are consolidated under GAAP.

(3) Receivable due from and Liability due to brokers for unsettled trades within certain credit investment funds which are consolidated under GAAP.

#### LIQUIDITY AND CAPITAL RESOURCES

Our principal sources of liquidity are unrestricted cash, cash equivalents and other liquid investments and distributions from operating subsidiaries, including income from our investment portfolio and sales of assets and investments. We intend to use our cash resources to continue to fund our operations and grow our businesses. We may seek additional sources of cash to fund acquisitions or investments. These additional sources of cash may take the form of debt or equity and may be at the parent, subsidiary or asset level. We are a holding company and our liquidity needs are primarily for interest payments on the Fortress credit facility, compensation, professional fees, office rent and insurance costs.

Our subsidiaries' ability to generate sufficient net income and cash flows to make cash distributions will be subject to numerous business and other factors, including restrictions contained in our subsidiaries' financing agreements, regulatory restrictions, availability of sufficient funds at such subsidiaries, general economic and business conditions, tax considerations, strategic plans, financial results and other factors such as target capital ratios and ratio levels anticipated by rating agencies to maintain or improve current ratings. We expect our cash and cash equivalents and distributions from operating subsidiaries and our subsidiaries' access to financing to be adequate to fund our operations for at least the next 12 months.

As of June 30, 2019, cash and cash equivalents, excluding restricted cash, were \$175.8 million, compared to \$86.0 million at

December 31, 2018, an increase of \$89.8 million.

Our mortgage business relies on short term uncommitted sources of financing as a part of their normal course of operations. To date, we have been able to obtain and renew uncommitted warehouse credit facilities. If we were not able to obtain financing, then we may need to draw on other sources of liquidity to fund our mortgage business. See Note—(10) Debt, net for additional information regarding our mortgage warehouse borrowings.

For purposes of determining enterprise value and Adjusted EBITDA, we consider corporate credit agreements and preferred trust securities, which we refer to as corporate debt, as corporate financing and associated interest expense is added back. The below table outlines this amount by debt outstanding and interest expense at the insurance company and corporate level.

#### Corporate Debt

(\$ in millions)	Corporate Debt Outstanding as of June 30,		Interest Expense for the Three Months Ended June 30,		Interest Expense for the Six Months Ended June 30,	
	2019	2018	2019	2018	2019	2018
	Specialty insurance	\$ 160.0	\$ 160.0	\$ 3.3	\$ 3.5	\$ 6.7
Corporate	70.2	74.0	1.6	1.2	3.2	1.8
Total	\$ 230.2	\$ 234.0	\$ 4.9	\$ 4.7	\$ 9.9	\$ 8.6

Our credit facility with Fortress carries a rate of LIBOR (with a minimum LIBOR rate of 1.25%), plus a margin of 5.50% per annum. We are required to make quarterly principal payments of approximately \$1.0 million, subject to adjustment based on the Net Leverage Ratio (as defined in the credit agreement) at the end of each fiscal quarter. The outstanding debt under the Fortress credit agreement was \$70.2 million as of June 30, 2019 compared to \$74.0 million as of June 30, 2018. On May 4, 2018, we amended the Fortress credit agreement to increase the amount outstanding, while extending the maturity date to September 18, 2020 and lowering the interest rate margin from 6.50% to 5.50%.

On October 16, 2017, Fortegra completed an offering of \$125 million Junior Subordinated Notes due 2057. The Junior Subordinated Notes contain customary financial covenants that require, among other items, maximum leverage and limitations on restricted payments under certain circumstances. As a result, in certain adverse circumstances, such limitations could restrict our ability to grow, or limit the dividends to the holding company to pay our obligations. Substantially all of the net proceeds from the Junior Subordinated Notes were used to repay existing indebtedness. We believe these funds will reposition Fortegra's balance sheet, strengthen the Company's positioning with industry rating agencies, and generate a source of long term capital. See Note (10) Debt, net for additional information of our debt and that of our subsidiaries.

#### Consolidated Comparison of Cash Flows

(\$ in millions)	Six Months Ended June 30,	
	2019	2018
Total cash provided by (used in):		
Operating activities	1.8	10.2
Investing activities	156.3	(49.6)
Financing activities	(64.5)	0.1
Net increase (decrease) in cash, cash equivalents and restricted cash	\$ 93.6	\$ (39.3)

Cash provided by operating activities was \$1.8 million for the six months ended June 30, 2019 compared to \$10.2 million of cash provided by operating activities in the prior year period. In 2019, the primary sources of cash from operating activities included consolidated net income (excluding unrealized gains and losses), increases in unearned premiums and deferred revenues, offset by increases in notes and accounts receivable, reinsurance receivables and deferred acquisition costs related to growth in our insurance operations. In the 2018 period, the primary sources of cash included mortgage sales outpacing originations in our loan origination business and increases in unearned premiums, reinsurance payable and policy liabilities in our insurance operations, partially offset primarily by increases in reinsurance receivables.

Cash provided by investing activities was \$156.3 million for the six months ended June 30, 2019 compared to \$49.6 million of cash used in investing activities for the prior year period. During 2019, we reduced our investments in loans and used a substantial portion of the proceeds to repay asset-based debt. We also received proceeds associated with a contingent earn-out from our sale of Care. In the 2018 period, the primary uses of cash were purchases of investments exceeding proceeds from sales and maturities of investments in our insurance investment portfolio.

Cash used in financing activities was \$64.5 million for the six months ended June 30, 2019 compared to \$0.1 million in the prior year period. In 2019, we fully repaid outstanding asset-based borrowings in our credit loan fund held within our insurance investment portfolio and we repurchased \$9.1 million of the Company's common stock. In the 2018 period, the primary uses of cash from financing activities were principal paydowns on asset-based financing in our specialty insurance investment portfolio and principal paydowns exceeding new borrowings on debt facilities in our mortgage business.

### **Contractual Obligations**

The table below summarizes consolidated contractual obligations by period for payments that are due as of June 30, 2019:

(\$ in millions)	Less than 1 year	1-3 years	3-5 years	More than 5 years	Total
Corporate Debt	\$ —	\$ 70.2	\$ —	\$ 160.0	\$ 230.2
Asset Based Debt	63.1	11.5	—	—	74.6
Total Debt	\$ 63.1	\$ 81.7	\$ —	\$ 160.0	\$ 304.8
Operating lease obligations <sup>(2)</sup>	7.0	13.5	10.0	13.8	44.3
Total	\$ 70.1	\$ 95.2	\$ 10.0	\$ 173.8	\$ 349.1

(1) See Note (10) Debt, net, in the accompanying consolidated financial statements for additional information.

(2) Minimum rental obligation for office leases. The total rent expense for the six months ended June 30, 2019 and 2018 was \$4.4 million and \$3.2 million, respectively.

### **Critical Accounting Policies and Estimates**

The preparation of our financial statements in accordance with U.S. GAAP, which requires management to make estimates and assumptions that affect the amounts reported in our financial statements and accompanying notes. Actual results could differ materially from those estimates. There have been no material changes to the critical accounting policies and estimates as discussed in our 2018 Annual Report on Form 10-K.

### **Recently Adopted and Issued Accounting Standards**

For a discussion of recently adopted and issued accounting standards see the section "*Recent Accounting Standards*" in Note (2) Summary of Significant Accounting Policies of the notes to the accompanying condensed consolidated financial statements.

### **OFF-BALANCE SHEET ARRANGEMENTS**

In the normal course of business, we enter into various off-balance sheet arrangements including entering into derivative financial instruments and hedging transactions, operating leases and sponsoring and owning interests in consolidated and non-consolidated variable interest entities.

Further disclosure on our off-balance sheet arrangements as of June 30, 2019 is presented in the "Notes to Condensed Consolidated Financial Statements" in "Part II. Item 8. Financial Statements and Supplementary Data" of this filing as follows:

- Note (9) Derivative Financial Instruments and Hedging
- Note (20) Commitments and Contingencies

### **Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Our 2018 Annual Report on Form 10-K described our Quantitative and Qualitative Disclosures About Market Risk. There were no material changes to the assumptions or risks during the six months ended June 30, 2019.

### **Item 4. Controls and Procedures**

#### **Evaluation of Disclosure Controls and Procedures**

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act) as of the end of the period covered by this report. The Company's disclosure controls and procedures are designed to provide reasonable assurance that information is recorded, processed, summarized and reported accurately and on a timely basis. Based on such evaluation, the Company's Chief

Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective.

### Changes in Internal Control over Financial Reporting

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

## PART II. OTHER INFORMATION

### Item 1. Legal Proceedings

Fortegra is a defendant in *Mullins v. Southern Financial Life Insurance Co.*, which was filed in February 2006, in the Pike Circuit Court, in the Commonwealth of Kentucky. A class was certified in June 2010. At issue is the duration or term of coverage under certain disability and life credit insurance policies. The action alleges violations of the Consumer Protection Act and certain insurance statutes, as well as common law fraud and seeks compensatory and punitive damages, attorney fees and interest. To date, the court has not awarded sanctions in connection with Plaintiffs' April 2012 Motion for Sanctions. In January 2015, the trial court issued an Order denying Fortegra's motion to decertify the class, which was upheld on appeal. Following a February 2017 hearing, the court denied Fortegra's Motion for Summary Judgment as to certain disability insurance policies. In January 2018, in response to a Plaintiffs' motion, the court vacated its November 2017 order granting Fortegra's Motion for Summary Judgment as to the life certificates at issue with leave to refile. No trial or additional hearings are currently scheduled.

In management's opinion, based on information available at this time, the ultimate resolution of such litigation, which it is vigorously defending, should not be materially adverse to the financial position of Tiptree. It should be noted that large punitive damage awards, bearing little relation to actual damages sustained by plaintiffs, have been awarded in certain states against other companies in the credit insurance business. At this time, the Company cannot reasonably estimate a range of loss.

Tiptree and its subsidiaries are parties to other legal proceedings in the ordinary course of business. Although Tiptree's legal and financial liability with respect to such proceedings cannot be estimated with certainty, Tiptree does not believe that these proceedings, either individually or in the aggregate, are likely to have a material adverse effect on Tiptree's financial position or results of operations.

### Item 1A. Risk Factors

For information regarding factors that could affect our Company, results of operations and financial condition, see the risk factors discussed under Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2018. There have been no material change in those risk factors.

### Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

#### Purchases of Equity Securities by the Issuer and Affiliated Purchasers

Share repurchase activity for the three months ended June 30, 2019 was as follows:

Period	Purchaser	Total Number of Shares Purchased <sup>(1)</sup>	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs <sup>(1)</sup>
April 1, 2019 to April 30, 2019	Tiptree Inc.	—	\$ —	—	\$ 19,281,960
May 1, 2019 to May 31, 2019	Tiptree Inc.	—	\$ —	—	\$ 19,281,960
June 1, 2019 to June 30, 2019	Tiptree Inc.	—	\$ —	—	\$ 19,281,960
	Total	—	\$ —	—	\$ —

(1) On December 7, 2018, the Board of Directors of Tiptree ("Board") authorized Tiptree to repurchase up to \$20 million of its outstanding Common Stock in the aggregate from time to time, \$10 million in the open market and \$10 million through block purchases or otherwise, subject to Tiptree's Executive

Committee's discretion. In January 2019, Tiptree made several block repurchases totaling approximately \$8.7 million. On January 24, 2019, the Board replenished the Executive Committee's authorization back to \$10 million in the aggregate to make block purchases or otherwise from time to time.

### CERTIFICATIONS

I, Michael Barnes, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Tiptree Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred

during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
